KYEEMA FOUNDATION

Local solutions for vulnerable communities

EMPOWER WOMEN. HELP US GET #KUKU4THEGIRLS

Small-scale poultry systems are important in food-insecure, resource-poor regions. Improving the health of chickens, or 'kuku' as they are known as in many parts of Sub Saharan Africa, contributes to each dimension of food security and empowers women. It is a key local solution for addressing several of the global sustainable development goals, mainly zero hunger, good health and well-being, quality education and gender equality.

Over the last 20 years, Kyeema Foundation and associates have developed working relationships in communities we serve. Today we continue this commitment to our vision in Africa and the Asia-Pacific region.
